## Anaphylaxis & Adrenaline Auto-Injector Training

**Qualification:** ITC First

**Duration:** 2 hours

**Certificate:** Certified by ITC First and valid for 3 years

**Learner age:** 16 years +

Do you know your Jext from your Emerade? Aimed at teachers, classroom assistants and anyone involved in the education sector, this practical course covers essential lifesaving techniques to ensure that you feel confident dealing with a severe allergic reaction.

With allergies on the increase, the ability to understand allergic conditions, anaphylaxis and how and when to use an adrenaline auto-injector is fast becoming an essential part of childcare. We can either run this course in isolation or adrenaline auto-injector training can be bolted on to any of our First Aid courses.

### + Suitable for

Teachers, classroom assistants and anyone involved in the education sector.

### + Core content

Recognition and treatment of severe allergic reaction, different types of auto-injector and their correct use, dealing with an unconscious casualty and CPR (adult and child).

#### **+ Assessment**

We'll observe you throughout the course and make sure you're completing all the practical tasks correctly. There's no scary exam or question paper. You'll need to be there for the full duration and get stuck in with all the practical work.

#### **+ Nature of training**

This is an active and practical course that involves rolling around on the floor and some occasional close contact with another learner. Learners need to take a full and active part and comply with our Covid-19 mitigation measures. Please contact us prior to the course starting if you require a reasonable adjustment.

#### **+ Prerequisites**

None

#### **+ Dual qualifications**

N/A

#### **+ Certificate**

Certified by our Awarding Organisation ITC First and valid for 3 years. Electronic certificates are emailed out to learners approximately 2 weeks after the training.

#### **+ Revalidation**
